A strong defense begins immediately, not in the courtroom. As soon as you suspect you may be charged with a crime, call me! If you have one phone call from jail, call me. (360) 419-9998

Just because you are being charged or accused of a crime does not mean that you don't have options to avoid an unjust result. Whether being accused of a felony or misdemeanor, have David Wall, an experienced and knowledgeable attorney, defend your rights in order to avoid any unjust consequences.

I do not rely upon police investigations. I get the facts myself and I can start investigating your case immediately. That can pay off in successful results. It is well-known that witnesses can be swayed or intimidated, and the ability to get recorded statements or physical evidence early in an investigation can prevent that from happening. Witnesses often lose their memory or change their position, so memorializing their statements early is imperative to a successful defense.
